A CONTROLLED PROCESS. A DOCUMENTED RESULT.

REMANUFACTURING PROCESS

Clear checkpoints from arrival through final verification

1

DISASSEMBLY & CLEANING

EPA-compliant cleaning systems prepare components for detailed evaluation and help protect critical surfaces.

2

INSPECTION & QUOTATION

Certified technicians compare mechanical, electrical, and diagnostic components with original OEM specifications. Consumables and nonconforming major components are quoted before work proceeds.

3

REMANUFACTURING & ASSEMBLY

Major components may be restored in ADVACO's in-house machine shop before reassembly in a dedicated manufacturing cell.

4

TESTING & QUALITY CONTROL

Proprietary systems generate graphical data certifying ultimate vacuum and pumping performance. Software reset and helium leak testing are addressed as applicable.

DOCUMENTED PERFORMANCE

Final verification provides a clear performance record before equipment returns to advanced materials production service.

SERVICE SCOPE

High-vacuum systems

CRYOGENIC PUMPS

TURBO PUMPS

Mechanical vacuum & diagnostics

DRY PUMPS

ROTARY VANE PUMPS

HELIUM LEAK DETECTORS

Support for critical advanced materials production assets.
